Alli's Originals

Wear your heart on your sleeve.

Simple. Unique. Heartfelt. Designer Alli Grosberg designs each piece of jewelry and hand stamps each sterling silver piece, creating personalized one of a kind jewelry. She uses only the finest quality materials including .925 sterling silver, swarovski crystals, semi-precious stones, and fresh water pearls.

The Princess Charming Collection is designed to celebrate the special relationships we have with our children, grandchildren, husband, or friendships. Select from a variety of necklaces, bracelets, charms, key rings or pet tags and personalize it with names, initials, or symbols. A la carte additions enable you to be creative by adding your own finishing touch with charms and crystals.

I just adore the necklace from **The Princess Charming Collection** that Alli created for me. Each sterling silver disc features a hand stamped letter symbolizing each of my four daughters. I chose the 16" ball chain and puffed sterling silver heart to accent the discs. It is the perfect combination that creates a simple, dainty and durable piece that is great for daily wear. My personalized necklace arrived in an organza bag with care instructions enclosed, perfect for gift-giving.

Alli's creative nature inspires her to design new styles to add to her unique collections. Watch for her own line of hand cut, pressed or molded pendants and charms that she will begin designing and creating herself.
